

“PREVENTION BY INVESTIGATION”

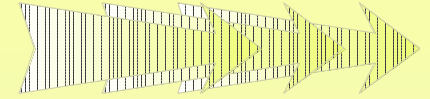

What is Investigator 3 ?

An incident investigation and analysis tool

for

Microsoft Windows, including the latest Vista edition

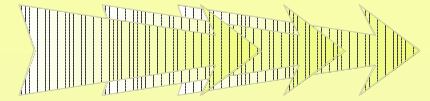

What is it for ?

The core of the investigation technique is

“Prevention by Investigation”,

the goal is

“Learn the right lessons from an incident to prevent similar incidents from (ever) happening again”

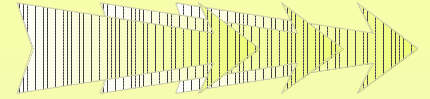

Investigator 3 supports the entire incident investigation and analysis process.

From the very start of an investigation throughout the management of the investigation process.

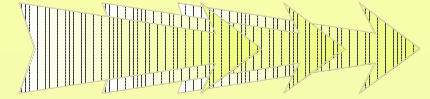

It supports the structured collection of evidence and relevant data.

It provides comprehensive root cause analysis and Tripod Beta analysis functionality and creates a clear, comprehensive incident investigation report.
